

MANUAL

Set Up and Operation

Adjustment of the ODIN CL-4 Connect Settings

- 01) Establish a connection with the ODIN CL-4 Connect.
- 02) Normally the SSID = ODIN. The password is: T-8A!Odin!S-18A.
- But, if the device has been reset to factory default settings, SSID = CL-4. The password is: **12345678**.
- 03) Open your web browser and, in the address bar, type in 10.10.100.254.
- 04) Now you need to insert the login and password (Login: admin; Password: admin).
- 05) Go to MODE SELECTION and select STA MODE (Station mode) and click on APPLY.

working Mode Configuration
You may configure the Uart-WIFI module wifi mode and data transfor mode.
AP Mode: Access Point
STA Mode: Station Mode
Data Transfor Mode Transparent Mode

06) Click on DEVICE MANAGEMENT and then click on RESTART.

Restart Module	
Restart Module	Restart

07) The CL-4 Connect will now reset and load the updated settings.

08) Connect the device in one of the 2 methods (please see pages 3-4, Method #1 and #2).

Method 1

01) Connect the CL-4 Connect to a switch via LAN. Connect a PC to a switch via LAN. **IP DHCP** DHCP-server STA Mode

Static IP 10.10.100.254 . 💿 💿 - C. 2000 B

Make sure that the switch does not use the IP address 10.10.100.254! This IP address is used exclusively by the CL-4 Connect!

- 02) Open the Odin Editor software and click on CONNECT.
- 03) Click on SCANF. The system will automatically search for the device's IP and MAC addresses.

🧱 Scanf	
IP	MAC
10.10.100.254	AC:CF:23:5E:5F:BA:5000
10	0%
IP:	Port: 5000
iocai audi ess: 10.10.100.10	00
Scanf	ок

04) Click on the IP address in order to select it. Click on the OK button to confirm.

👼 Scanf
